\$2.00 A YEAR IN ADVANCE

HISTORY AND MANAGEMENT OF DRUMHELLER HOSPITAL

(By Edna Kells)

The Alberta Municipal Hospitals scheme may be successfully adapted to meet the needs of any community as demonstrated by the hospital at Drumheller. This hospital serves approximately 26,000 persons and of this number 5000 are miners and their families. These miners are under contract with the hospital board, the latter undertaking for the sum of \$9.00 yearly to provide free hospital service to each miner and his family. Under this arrangement approximately \$20,000 finds its way from the pay envelopes of the miners to the coffers of the hospital.

Drumheller has the lowest mine contract of any in Canada, so far as can be learned. \$9.00 per family is a comparatively small sum when one considers the cost of the upkeep of so large a hospital as that at Drumheller, but it covers the miners' share of the hospitalization cost. This is possible because the bachelors and the transient workers who drift from field to field when the slack time comes in summer. Sometimes these transients object to the money being deducted from their pay envelopes, but they receive and accept the benefits just the same, and the utmost harmony exists between the hospital board and the miners' union. The miners regard the \$9.00 they pay as a good investment. The contracts are made through the Miner's Union, which in turn arranges with the mine owners to deduct \$9 from each miner's pay, withholding \$3.00 from the first, third and fifth pay envelopes in each year. Miners also have contracts with the Drumheller doctors where by they pay \$1.50 per month and secure in return free doctor's service, drugs, etc., for themselves and families, except confinements. A fee of \$15.00 is charged by the doctor for these cases.

There is a real reason for the miners' interest in the hospital, and it dates back to the opening of the first

(Concluded on Page 5)

HUGH MACDONALD HEADS CALGARY NORMAL SCHOOL

Quite an honor has been bestowed upon Hugh John MacDonald of Carbon when he was elected president of the Calgary Normal School for the autumn term. Saturday's issue of the Calgary "Albertan" has the following to say regarding the election of officers:

"Hugh John MacDonald of Carbon will guide the destinies of the Normal Student's Association for the autumn term of 1929, according to the results of a ballot of the whole school on Friday afternoon.

"The election was conducted on the preferential system and was the culmination of a week of strenuous campaigning on the part of the six candidates for the Presidency. Wednesday afternoon the whole school convened in the assembly hall of the institution and heard the campaign speeches."

PINNIONED HORSE ON TRACK HOLDS UP SPECIAL LAST WEEK

A horse, struggling to free its legs from between the ties of a trestle bridge on the C.P.R. line from Calgary, caused a delay of the special train bearing E. W. Beatty and his friends to Drumheller, according to information given to the Mail by one of the railway officials.

The horse was sighted in time for the engineer to stop the train and upon investigations being made, it was discovered that the animal had three broken legs. A search for the necessary equipment to rescue the horse was unavailing and as no firearms were on board, it was necessary for the train crew to kill the animal with a sledge hammer before the road could be cleared. The accident was responsible for the train arriving at the Drumheller C.N.R. depot thirty minutes behind schedule. -Drumheller Mail

CARBON THEATRE ARRANGES FOR GREAT WAR PICTURE

"Legion of the Condemned" to be Shown Here Next Week

The management of the Carbon Theatre has announced that they will show that great epic of the World War, "The Legion of the Condemned" next Friday and Saturday, October 11 and 12. This is a special picture, but it will be shown at regular prices and this will probably be your only chance to see this show.

This week, Friday and Saturday, October 4th and 5th, the picture to be shown is "The Winning of Barbara Worth."

LITTLE ITEMS OF LOCAL INTEREST

We understand that Robt. Greenhalgh has been successful in getting the position as janitor of the Carbon school.

Masonic Service will be held at the Carbon United church on Sunday, October 6th. The Rev. Wm. McNichol will deliver the address.

Jack Spence is back in Carbon again and has taken a position as operator in the local C.P.R. depot.

This week all subscribers to the Chronicle received a notice if their subscription was due. Please bear in mind that it takes money to run a newspaper and if you are one of the delinquents we would be glad to have you call around and settle your account. Thank you.

Don't forget the dance in the Elks Hall on Friday (tomorrow) night. A good orchestra has been engaged and you are assured of a jolly time.

A nurse from the Department of Health at Edmonton, will lecture in the Farmers Exchange hall on Friday afternoon, October 11th. Her subject will be "Home Nursing and First Aid." A cordial invitation is extended to the ladies of Carbon and district.

Mrs. T. J. Ramsay and Mr. McNaughton motored to Calgary the first of the week.

Mr. and Mrs. Burnett left last week for their home in Lansing, Michigan, after spending the past couple of months visiting with their daughter and son-in-law, Mr. and Mrs. W. Leitch. Mrs. Leitch accompanied them to Calgary on Saturday and returned Sunday evening.

The Anglican church, which is under construction in Carbon is going ahead rapidly and it will not be so very long before the building will be completed.

B.C. Barr has his new oven and other baking equipment about ready and he expects to move in to the new bake shop before long.

Carbon and district is enjoying its Indian summer now and some real warm days have been experienced the past week. The nights have been cool with light frosts.

ELKS' DANCE PROMISES TO BE BEST OF THE SEASON

We understand that final preparation has been made for the best dance of the season, which will be held in the new Carbon Elks Hall on Friday (tomorrow) evening under the auspices of the Carbon Elks. A local five-piece Elks' Orchestra has been engaged and a good time is promised those who attend. Lunch will be served at midnight. Everyone is welcome, so come and enjoy yourself.

HUNGARIAN PARTRIDGE SEASON OPENED HERE TUESDAY

The season for the shooting of Hungarian Partridge opened on Tuesday of this week and a number of the local nimrods were trying their skill on these fine game birds and although the partridge are reported plentiful in this district no large bags have been

CROP REPORT ISSUED BY THE BANK OF MONTREAL

General—Throughout the Prairie Provinces, apart from slight delays through rain, threshing has proceeded uninterrupted and with favorable weather will be completed in a week or ten days. The yield of wheat is reported to be from 11 to 12 bushels per acre. The quality is excellent, the grades being mostly Nos. 1 to 3 Northern. The yields of coarse grains are disappointing. In Quebec harvesting operations have progressed well in favorable weather. In Ontario harvesting has been practically completed, the yield of fall wheat being satisfactory and the yield of other grains below average, but of good quality. In the maritime provinces ideal ripening conditions have prevailed and all crops look well. In British Columbia weather conditions have been favorable and crops of good quality are being harvested. Details follow:—

Alberta, Western Area—Threshing is about 75 per cent done. In the Northern section the average yield is about 12 bushels but in the centre the yield generally is small, although from 7 to 25 bushels on summerfallow. In the south threshing is 60 per cent complete with summerfallow yields 25 bushels and up. The grading is Nos. 1 and 3 Northern. The digging of su-

gar beets will begin in a week and the crop is estimated to be the largest since 1925. The feed situation is satisfactory.

Northeastern Area—Threshing is 70 to 90 per cent completed and yields ranging 5 to 20 bushels grading No. 2 Northern. The average yield is about 8 bushels.

Southeastern Area—Threshing is practically done with yield from 7 to 15 bushels grading Nos. 2 to 4 Northern.

Saskatchewan, Northern Area—Threshing is progressing well and is about 65 per cent completed. Wheat is of good quality with a fairly satisfactory yield. Coarse grains are well below average.

Southern Area—Threshing is almost completed. Wheat yields are light, but of good grade. Coarse grains are poor.

Province of British Columbia—The apple crop is about 85 per cent of average and of excellent quality. Good average grain crops of high grade have been safely harvested in the Fraser Valley and on Vancouver Island. Tomatoes are improving. Potatoes and other vegetables are yielding good crops. A heavy crop of hops of excellent quality has been picked.

reported. However, anyone trying to shoot these birds on the wing will know that there is a knack in getting the partridge and from the best sources we learn that this knack is after the bird has been flushed; just wait a few seconds until your bird is away and this will give you better aim and although you will have a shot of about

forty of fifty yards, the birds are easily killed for they usually fly away from the hunter and he has every opportunity with a straight away shot. It is easy to give advice, but the editor tried this recipe and so far has not been successful in bringing home the bacon. But "practice makes perfect" and we haven't given up hopes.

Last Chance !

BUT IT'S A GOOD ONE

Potatoes (NETTED GEMS)

\$2.95 Per Sack

WE HAVE MADE VERY THOROUGH INQUIRIES INTO THE POTATO SITUATION AND HOLDERS ARE WILD EYED IN THEIR OPINIONS. B.C. SPUDS ARE AWAY UP IN THE AIR. THE NEXT POTATOES ON THIS MARKET WILL BE THE NEW BRUNSWICK, AND DON'T YOU WORRY, THEY WILL GET THE FEVER TOO.

This car (our 3rd) will be in about OCTOBER 11th., and this price is off car only. 500 sacks at less than \$2.00 per bushel. 15c per sack more out of the store.

Canadian Anomalies

Following the close of the Great War by the signing of the Armistice, Canada demanded and was accorded a place of equality with other nations of the world at the Peace Conference, and, with the creation of the League of Nations, Canada entered that League on exactly the same terms as all other nations. That is to say, Canada was recognized as a nation. And in signing the League Covenant, Canada accepted the responsibilities of a nation.

At the last Imperial Conference, in London, with all the self-governing Dominions of the Empire and the British Government fully represented, a formal declaration was adopted setting forth that Canada and the other self-governing Dominions were fully autonomous nations within the British Commonwealth of Nations, possessing exact equality with Great Britain.

As a logical outcome of these declarations, Canada has established her own legations in certain foreign countries, appointed her own ministers, and, in turn, these countries have named ministers at Ottawa. Thus, as a nation, Canada has direct representation at Washington, Paris and Tokio, in exactly the same manner as any other country. Equally significant is the fact that the British Government has appointed a High Commissioner to Canada, while Canada maintains a High Commissioner in London.

But while Canada is thus recognized as a nation, it is the only nation in the whole world which has no nationality of its own, and no distinctive flag of its own. These are anomalies which other people find it extremely difficult to understand.

In England, people born in that country are recognized and officially listed as English; if born in Scotland, they are listed as Scottish; in Ireland, as Irish; in France, as French; in Germany, as German; in the United States, as American. Born in Canada, on the other hand, a person may be listed as of any nationality under the sun except Canadian. Officially, there is no such person as a Canadian.

The writer of this article was born in Canada as were his father and mother. His mother's parents were both born in Canada. His father's parents were born in Ireland, their ancestors having crossed to the Emerald Isle from Scotland. So the writer becomes, in Canada, an Irishman although neither he nor his parents ever saw Ireland. If his grandfather had been born in Siam, then the writer would be a Siamese.

In the face of such an anomaly, such a ghastly absurdity, it is little wonder that the people of other countries laugh in the face of any person born in Canada who is bold enough to lay claim to his country being a nation.

Every nation in the world, except one, has a distinctive flag of its own. The exception is Canada. Australia, New Zealand, South Africa, Newfoundland, the Irish Free State all have their distinctive national flags, as well as the Union Jack, the flag of all of Great Britain and the Empire. Canada has a distinctive flag for its merchant marine, and by Orders-in-Council it has been decreed that this shipping flag shall be flown over Canadian Government buildings in the British Isles, and in foreign lands, but it is not officially recognized anywhere else.

Thus, while a Canadian may fly a distinctive Canadian flag over a ship owned by him, he may not fly it over his office building or his residence, and while such a flag may be flown over a Canadian Government building in London, Washington, Paris, or Tokio, it cannot be flown over a Canadian Government building in Halifax or Vancouver, or anywhere between these two points.

A person born in Canada is, therefore, that peculiar individual among the peoples of the world who has no nationality he can call his own, and no distinctive flag that he can properly fly in his own land and over his own home and public institutions.

And yet the people of Canada find pride in calling Canada a nation. Why, this so-called nation of Canada has not even the right to amend its own constitution, a power possessed by other self-governing dominions of the British Commonwealth.

Canada is, and is proud to be, and desires to remain, a part of the British Commonwealth of Nations. It is proud of and loyal to the Union Jack as the flag of that great Commonwealth, and will ever retain it. But just as the Dominion has its own Coat of Arms, and each Province its Arms, and each city its Arms, so do the people of Canada desire to establish and retain their own nationality, have their own distinctive flag, and enjoy full autonomy in their domestic affairs.

Much as a native born Canadian may love England, or Scotland, or Australia, or New Zealand, he does not desire to merge his identity or lose his individuality. He is a Canadian and desires to be known as such, not as an Englishman, a Scotsman, an Australian or a New Zealander.

If Canada is a nation, let it display the qualities and the insignia of a nation.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

All Weather Road Promised

From International Boundary To Prince Albert National Park

An all-weather highway from Regina or the boundary to Prince Albert National Park will probably be put into condition, F. R. MacMillan, of Saskatoon, president of the Saskatchewan Conservative Association, told members of the Kiwanis Club at Prince Albert. He thought that this should be the policy of the government, and the fact that a cabinet minister in the Anderson Government, Hon. J. A. Merkle, was on a trip to the park was an evidence of the government's interest.

Escape From Submarine

Men Leave Submerged Craft In Record Time During Experiment

Ten men emerged from the sunken submarine T-17 in forty-eight seconds during a submarine experiment in Italy, making what is called a world record for such a feat.

Half of the participants used head pieces, while the others were not especially equipped. The submarine carried a new device consisting of a large bowl beneath a torpedo tube permitting the men to leave the submarine without water entering the hull.

HEALTH REGAINED

Mother and Daughters Restored Through the Use of Dr. Williams' Pink Pills

"Contrary to what my friends once thought, I am still living," says Mrs. Norman White, New Canada, N.S., "and I give the credit to Dr. Williams' Pink Pills. I had been a sufferer for some years. I was weak and run-down; my heart would palpitate violently at the least exertion. I grew so weak that I could not do my housework. I was under a doctor's care, but it did not benefit me. A second doctor was called in, but with no better results. I was told that I was almost bloodless, and I became so weak I was forced to remain in bed. My friends did not believe I could recover. While in this condition a neighbor strongly urged me to try Dr. Williams' Pink Pills. It was like grasping at a straw, but six boxes of this medicine were got for me, and by the time I had taken them I was able to sit up. Another six boxes were got and soon I was able to go about, my health steadily improving. I continued the use of the pills until I felt my health fully restored. I still take the pills occasionally as a safeguard. My two daughters have also used the pills with the most beneficial results. The trouble in both cases was the anaemia that so often comes when girls are entering womanhood. Under the use of this medicine both fully regained health, strength and activity. You can see, therefore, that it is impossible for me to praise Dr. Williams' Pink Pills too highly, and I hope every weak person who may read this will benefit by my experience."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Five hundred years before the birth of Christ, Hippocrates, a Greek, wrote a book on medical science which is still studied by students in America and Europe.

Externally Or Internally, It Is Good. When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Roumanian Scientist Designs "Space Rocket"

Hopes To Carry Mail To America In Thirty Minutes

A "space rocket," designed to shoot upward for 32 miles, and, it is hoped, be the forerunner of a rocket that will carry mail to America in 30 minutes, is to be built at once, it has been learned.

Prof. Hermann Oberth, a Roumanian scientist, designed the rocket. It will be built under the supervision of the U.F.A. Film Company. Its object, for the first flight, is to measure the physical and chemical properties of the atmosphere. Instruments will be enclosed in it to this end.

Artificial Silk From Acetic Acid

Combined With Cellulose Will Make Fine Fabric Is Predicted

Prediction that the sour taste in vinegar will be used to make artificial silk was made to the United States Chemical Society today by Professor D. B. Keyes, of the University of Illinois. The sour substance with which chemistry's magnetic touch may make finer dresses was called by Prof. Keyes by its scientific name, acetic acid. He told of a newly-developed process at Illinois for making it, developed in co-operation with E. P. King and Sherlock Swanne, of the university. For making artificial silk it is combined with cellulose to form cellulose acetate.

Minard's Lintment for Neuritis.

What's In a Name?

An Englishman's home is his castle, but whether he is able to call his castle what he likes is a matter of some doubt. The thought arises because the Bank of England officers have decreed that the words "Bank of England" on a building in Burnley must be removed. The words, carved in bold letters in stone, have adorned this building for over a hundred years. Why they are there on one knows.

World's Grain Show

National Committee Will Meet In Toronto In November

Hon. W. R. Motherwell, Minister of Agriculture, is calling a second meeting of the national committee of the world's grain conference and exhibition. The meeting will be held in Toronto on November 21.

Considerable work has been accomplished in preparing for the world conference which will be held in Regina in 1932. The tentative prize lists will soon be ready and will be so arranged that every province will have good chances in some of the classes. As soon as the lists are completed copies of them will be sent to all foreign countries with invitations to compete.

Calgary TORONTO Montreal
Vancouver Winnipeg

GRAIN EMBARGO IS REQUIRED TO EASE CONGESTION

Winnipeg. — Serious congestion in the lake head's mammoth grain elevators brought suggestions that the placing of an embargo on western grain shipments appeared to be the only remedy to the situation.

Fort William and Port Arthur terminal elevators, with a storage capacity of 86,000,000 bushels today are housing practically 70,000,000 bushels, leaving a comparatively small storage space through which to move the incoming crop.

Lack of demand for Canadian grain in the world markets and the resulting congestion at Montreal, is responsible for the situation at the head of the lakes, and railway authorities here intimated that the placing of an embargo probably will be necessary.

E. B. Ramsay, chairman of the board of grain commissioners, commenting on the situation, said an embargo seemed to be the only remedy.

A similar situation arises every fall, pointed out the grain board chairman. He indicated however, that last year at this time the shortage of cars to handle the heavy prairie crop had itself acted in the nature of an embargo, preventing progress of grain to the lake head. This season, with sufficient cars available to move the wheat east of Port Arthur and Fort William elevators are reported plugged almost to capacity, while harbor conditions do not point to an early rush east of lake boats.

Balloon Found Unmanned

Believed To Be One Piloted By French Flier

Paris. — A tragedy of the air was indicated as a balloon without passengers floated to the ground near Kamenice, Jugo-Slavia.

The Aero Club of France was advised the balloon carried the club's flag, and that blood spots were found on the torn basket. An altimeter registering 5,000 meters (about 19,000 feet) was found by peasants nearby.

It was believed the balloon was the one in which Pilot Nuguer left St. Cloud, near Paris, to compete in the Aumont Thievillie Cup race. The place where the bag was found is 850 miles from Paris.

Convicted Of Manslaughter

Mrs. Pantages, Wife Of Theatrical Magnate, Found Guilty By Jury

Los Angeles. — Mrs. Lois Pantages, wife of the theatrical magnate, was convicted of manslaughter by a jury which heard her trial on a charge of second degree murder.

The jury of five women and seven men made no recommendation for leniency. The sentence for manslaughter is fixed by California law at from one to 10 years in the penitentiary. Three women jurors wept as the verdict was read.

Mrs. Pantages was charged following the death of a Japanese gardener, killed when their automobiles collided last June.

Denies Dirigibles Are Obsolete

London, England. — Emphatic denials of the statements in London newspapers that the dirigibles now under construction for the British Government—the R-100 and the R-101—were obsolete, was made by Commander Sir Charles Burney, head of the Airship Guarantee Company which is building the R-100.

Favors Canadian Flag

Nanaimo, B.C. — After debating for more than an hour, whether or not Canada had a distinct national flag of its own, the British Columbia School Trustees' Association decided that she had not, and that the proper authorities should be informed that the association favored a distinctive emblem.

There are only about 40,000 Eskimos in the entire Arctic.

W. N. U. 1805

Colony For Doukhobors

Two Hundred and Fifty Members Of Sect Transferred From Jail To Colony In B.C.

Nelson, B.C. — Some 250 Doukhobor men, women and children who have been confined to the provincial jail here, were transported by the provincial police to Porto Rico.

Porto Rico is a former Christian community lumber camp which is situated some 15 miles south of Nelson. Last Friday when these Sons of Freedom were camping on the outskirts of the city, Peter Veregin offered this old camp site to the Doukhobors as a permanent habitat.

Starting early in the morning trucks and buses carried loads of prisoners from the jail to Porto Rico until 4 p.m., when all the Doukhobors had been safely landed. Each bus in addition to the prisoners, carried a couple of deputies to preserve order if necessary. This measure was not necessary.

When all had arrived at the camp it was noticeable that many of the Doukhobors directly started to pick out living quarters from among the camp buildings.

The majority of the buildings at the camp are windowless and doorless, and the more industrious of the Doukhobors began to repair their future homes to protect them against the cold nights that are setting in.

Will Start In December

Preparations Almost Completed For Western Air Mail Service

Ottawa, Ont. — The western air mail service will be inaugurated early in December and the tentative date for the first flight has been set for the second week of the month.

This announcement follows the statement of the Department of National Defence that the radio and light beacons and the emergency landing fields will be installed and ready for use by December 1. The Post Office department is fully prepared to put on the service at that date, and the Western Canada Airways, it is understood, have completed preparation and should begin the flying end of the service on short notice.

The bi-weekly air mail service from Edmonton north along the Mackenzie River will begin earlier than the main service across the prairie provinces. This northerly service will commence as soon as the winter season sets in and the planes can use skis with safety.

New Airway Mapped

London To Capetown Will Be Longest In World

London, England. — The longest airway in the world—an 8,000-mile route from London to the Cape—is to be inaugurated by the Imperial Airways early next year.

As a result of the great 20,000-mile aerial survey of Africa, made by Sir Alan and Lady Cobham in their big Short Rolls-Royce flying boat, a route through the heart of tropical Africa, passing over deserts and jungles, has been mapped out.

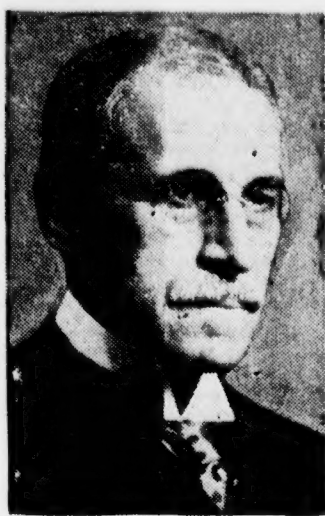

Agreements have been made with the various governments concerned for supporting the air line, and preparations are now being completed for its opening. Passengers and mails will leave London every Saturday in a giant triple-screw Armstrong-Siddeley air liner, and will arrive in Capetown nine days later, having flown by a combination of big air liners and all-metal flying boats.

Discuss Coal Prices

English Mine Owners Consider Question For Canadian Trade

London, Eng. — A dozen large coal mine operators from various parts of the country met Rt. Hon. J. H. Thomas, at the treasury, to discuss the question of prices of coal for the Canadian trade. The minister for employment who has just returned from Canada pointed out the great possibilities of the Dominion for British exporters. It was stated the deputation was not officially representing the mining association of Great Britain, but it was noticed that Evan Williams, chairman of the association and W. Lee, its secretary, were among those present. No statement was issued immediately.

CHAIRMAN OF ROYAL COMMISSION

Phillip D. Ross, proprietor of the Ottawa Citizen, has been appointed chairman of the royal commission, announced by Premier Ferguson, which will study the welfare needs of the province.

Will Remain In Canada

No Truth In Rumor That Sir Henry Thornton Was Leaving

Ottawa. — Sir Henry Thornton will remain in Canada as president of the Canadian National Railways. Any doubt on this point was settled by Premier Mackenzie King, following a recent meeting of the cabinet. In the absence of Hon. C. A. Dunning, minister of railways, who is in the West, the Prime Minister was unable to say whether or not a renewal of Sir Henry Thornton's contract with the government had been signed.

There was no question, however, about Sir Henry remaining in Canada, the prime minister said.

Recently there have been rumors that the president of the Canadian National might go to England.

Ban Religious Holidays

Soviets Dispense With All Religious Holidays, Including Sundays

Moscow. — All religious holidays, including Sundays, are abolished under the new 24 hour system of labor introduced throughout the Soviet Union. Workers are given one day of rest every five days.

The only holidays not abolished are October 25, anniversary of the October revolution; January 9, anniversary of Lenin's death, and May 1st and 2nd, international days of labor celebrations.

Edison's Pupil Visits Canada

Walter Huston, Seattle boy who won the special prize donated by Robert Edison, for research and inventive potentialities, was a visitor to Canada recently, when he took Canadian Pacific coast steamship "Princess Marguerite" in a round trip from his home city to Victoria and Vancouver, Huston who is likely to become a second Edison, will devote his life to scientific research, he says, following the example of his famous friend and mentor.

Reparations Bank Shunned By League

Committee Withdraws Resolution To Establish Intimate Connection

The League of Nations will not seek, for the present, to establish close relationship between itself and the international reparations bank provided by the Young plan.

This became clear when a resolution envisaging the establishment of an intimate connection between the two was withdrawn from consideration in the Assembly's committee that deals with economic questions.

But its authors, Norway and Denmark, in withdrawing are believed to have gained part of their purpose.

Their move was interpreted in some quarters as a signal by the countries not concerned directly with reparations payments that they will not be greatly pleased if the proposed bank seeks to assume too dominant a function in the economic life of Europe.

No Canadian Race

But Bureau Of Statistics Accepts "Nationality—Canadian"

Ottawa. — There is a Canadian nationality but no Canadian race, and any government form filled with nationality as "Canadian" is accepted, it was learned at the Dominion Bureau of Statistics.

Complaint was made in Toronto of a father who three times entered his child as Canadian and the form was returned, Ottawa being blamed. It is pointed out here that the vital statistics forms are made to the provincial authorities and not to Ottawa.

If the form was returned because the new baby was termed Canadian, it must have been returned by the provincial authorities. The Bureau of Statistics accepts "Nationality—Canadian," but also seeks racial origin, which has nothing to do with nationality.

New Zealand Showing More British Pictures

Quota Has Been Set By Regulations Of Government

Wellington, New Zealand. — A greater proportion of British moving pictures will be shown in New Zealand in the future, according to new government regulations. From October 1, exhibitors will be required to screen a fixed quota of British films.

The government says it has been assured ample supply of both the talking and silent films from British studios will be available during the coming year.

LABOR PARTY IN ONTARIO HAS ENTERED LISTS

Toronto. — The Ontario Labor party officially entered the lists for the coming election when it issued as the first step of its campaign, a manifesto giving the following by way of a minimum program:

Unemployment insurance. Extension of the public ownership principle.

A law to permit the election of police commissions.

A liquor referendum.

Compulsory public liability automobiles insurance.

Amendments to the Old Age Pension and Mothers' Allowance Acts.

The manifesto criticizes Premier G. Howard Ferguson, leader of the Conservative party, for bringing on an election "long before it was necessary to appeal to the country. Possing as an advocate of responsible government he has not thought fit to use the British method where the Premier announces on the floor of Parliament before the elected representatives of the nation that on a certain date an election will be held."

The Labor party has always stood for the discussion of the liquor problem free from party politics, says the manifesto. "It recognizes that the solution of the problem is the taking of the manufacture of liquor away from private capitalists. If there is to be government control, it must not only be control of the retail sale of liquor but also of its manufacture. It is therefore of the opinion that in a question like the liquor issue, where centuries of prejudice exist on both sides, that the question should be submitted to the people in the form of a referendum."

Issue Interesting Report

Grain Commissioners Publish Baking Tests Of 1929 Flour

Winnipeg. — Low weight per bushel, lower flour yield, higher protein content; lower water absorption of the flour and excellent baking quality are features of a preliminary report on the milling and baking characteristics of western Canada's 1929 wheat crop, issued by Dr. F. J. Birchard, chief chemist to the Board of Grain Commissioners for Canada, and his assistant, T. R. Aiken.

Milling and baking tests conducted at the Dominion Grain Research Laboratory, in Winnipeg, indicate that, on the whole, the milling yield is inferior, but the baking quality, grade for grade, is fully equal to it not superior to that of last year, states Dr. Birchard, in the report. The effect of frost and immaturity is not a serious consideration as was the case last year; practically all the wheat is sound and mature, but each grade contains an increasing number of undeveloped kernels and consequently the weight per measured bushel would appear to be the chief factor in determining the grade.

Tariff Board Application

Ottawa. — Initiation of investigations based on ten or more new applications will feature the first fall sittings of the tariff advisory board which will open on Tuesday, October 26. Chinaware, glassware, linoleums and wall papers are among the commodities that will come under review at the hearings, which will extend over two weeks.

Birds Lured To Death

Toronto. — Lured by the brilliance of the beacon at Long Point, on Lake Erie, near Port Rowan, more than 800 song birds migrating to warmer climes for the winter, met death recently. Flying through a fog the birds were attracted by the bright light and dashed to death against the walls of the lighthouse.

Exhibiting Canadian Pictures

Ottawa. — Four pictures from the National Gallery of Canada will be sent to London shortly as the Dominion's contribution to the exhibition of Italian art, which will be held at the Royal Academy early next year. The exhibition is to be one of the most comprehensive ever held, embracing Italian art from the 12th century to the present day.

YOU CAN'T RIDE A GRUDGE

Do you carry grudges? Cast them
aside. Your burden in life is heavy
enough without. Do you boast of your
grudges as a sign that you are a free
man? Don't do it. Though you may
have created your grudges and though
you may feed them, they are your
masters. You may carry your grudge
uphill through life, but it will carry
you only down.

How often we hear the voice in the
street in violent impatience. Smith
cries: "If Jones is for it I am against
it." Then Jones controls Smith's mind
more firmly than if he were his closest
friend.

It is not worth while to waste our
energies and vitiate our minds in hate
and resentment. It is right to hate
evil, but merely pity evil men.

If you have been wronged, forget.
Why keep the injury fresh? You suffered
enough at the time.

Do you long for revenge or to "get
even" with his triumph. You continue
his ascendancy. You hypnotize your-
self within his spell.

It doesn't pay.

Many happinesses are shared by the
least fortunate of us, and many mis-
fortunes befall the happiest of us.
None of us can well afford to spend
the hours of retrospect and prospect
in other than the happiest memories
and the brightest hopes that charity
and love can summon.

UNITY WITHOUT PREJUDICE

Men talk of the unity of Canada's
greatest need—unity, unity, the one
thing for all. Yet in the same breath
these men denounce the national spirit
growing up in Canada as unbecoming
a dominion of the empire. What non-
sense! Why this fear of Canada's nat-
ural, courageous yearning for nation-
hood.

Are our men in the spotlight so tied
to apron string ideas that they can-
not visualize a National Canada as
part of the British Empire.

Must we forever teach our Cana-
dian-born children that this Canada
of ours is only a colony of Britain;
that an empire citizenship in the land
that gave them birth is all the citi-
zenship they are entitled to?

But how can we have unity under
a teaching so narrow and so nega-
tive?

Give Canadians something tangible
to unite upon—give our children the
"my country" idea—and our propa-
gandists will not have to worry so
much about the matter of Unity—Ex.

PLANNING THE SMALLER TOWNS

(The Calgary Albertan)

The editorial columns of the week-
ly newspapers are interesting these
days as an index of the increased at-
tention which is being given to the
matter of town planning. That the lar-
ger cities whose mistakes of 50 and
60 years ago can never now be recti-
fied should not consider themselves
too old to learn is encouraging enough
but that the smaller and younger pla-
ces are ready to profit by their older
and bigger brother's errors is more

hopeful still. It seems unlikely that
the village of today which is to be the
city of tomorrow will suffer from nar-
row streets, residences and industries
thrown together in a meaningless mel-
ange, and other evidences of haphaz-
ard growth. Wainwright, for instance,
whose heart was lately burned out by
a disastrous fire, is one of the towns
thus to profit by the opportunity to
rebuild according to scientific princi-
ples. At Carbon, with only 650 popu-
lation, the village council issued last
week a public proclamation of inten-
tion to introduce a zoning bylaw under
the Town Planning Act, by which
building restrictions will be imposed
on those parts of the village lying
north and west of Kneehill Creek. In
Drumheller the Town Planning Com-
mission has commenced negotiations
with the provincial Town Planning
Board for the drawing up of miner's
home building scheme by which will
be ultimately eliminated the unsightly
shacks which constitute the average
mining camp. These will be replaced
by cottages within the financial reach
of the average miner.

This general realization of the im-
portance of town planning encourages
the hope that the Alberta of the fu-
ture will be a place not only of more
beautiful but of more healthful homes,
housing, as a matter of course, hap-
pier families.

PUBLIC OWNERSHIP

While the Advocate regrets that so
many municipalities are passing over
their public utilities to the Calgary
Power Co. and other public companies,
yet it does not hold the municipali-
ties so much responsible therefore as
the Government and legislators of the
province. The Province should have
taken control of the manufacturing
and wholesale supply and left the mu-
nicipalities to look after the local dis-
tribution. As it is now, the Province
will either have to buy out the Cal-
gary Power Co. some time and pay
far more for its properties than it
need have done had it installed the
power construction itself, or abandon
the power field entirely to private cap-
ital, with the telephones to be sold
out also. There may be reasons for
want of action on these lines by the
Alberta Government, but the Advocate
believes that the administration has
not sufficiently realized the rapid ad-
vances and the grip that private cap-
ital is getting on the public utilities
of the province, and has not been sel-
fized of its duty to protect provincial
and municipal utility interests from
private aggression.

According to a recent statement of
the treasurer of the Ontario Govern-
ment, private interests would readily
pay 500 millions, or a sum large enough
to liquidate the entire debt of the
province of Ontario, for the provincial
hydro system of that province, which
is valued at cost by the Hydro-Elec-
tric Power Commission at 150 mil-
lions.—Red Deer Advocate.

ONLY A NEWSPAPER GUY

I see a man strut through a jam in
a hall.
Take a seat 'mid the speakers and
chat with them all.
"Is this Murphy?" I ask, "that a crowd
he defies?"

glitters and shines.

"Chief Kenlon" I ask, but a fireman
replies,

"Oh, no, why that's one of those
newspaper guys."
I see a man start on the trail of a
crook.

And he scorns all assistance and
brings him to book.

"Mr. Burns?" I inquire, someone scorn-
fully cries—

"Burns? Naw, he's just one of them
newspaper guys."

I see a man walk through the doors
of a show

Where great throngs are blocked by
the sign S.R.O.

"Is this Goodwin himself that no tick-
et he buys?"

"Well hardly, he's one of the news-
paper guys."

I see a man knock on a President's
door,

And the sign, "No Admittance" com-
pletely ignore;

"Is this Morgan, that privacy's right
he denies?"

"Morgan? Shucks! It's just one of
those newspaper guys."

And some day I'll walk by the great
streets of gold

NOTICE TO ALL THRESHERMEN

Owners or operators of threshing
machines and combined harvesters are
required to have their machines regis-
tered with the Department of Agricul-
ture and to send the Department at
the end of the threshing season a re-
turn showing the number of acres and
number of bushels threshed. This ap-
plies whether the machine is to be
used for custom work or only for the
owner's crop.

Special forms for these returns may
be secured from the

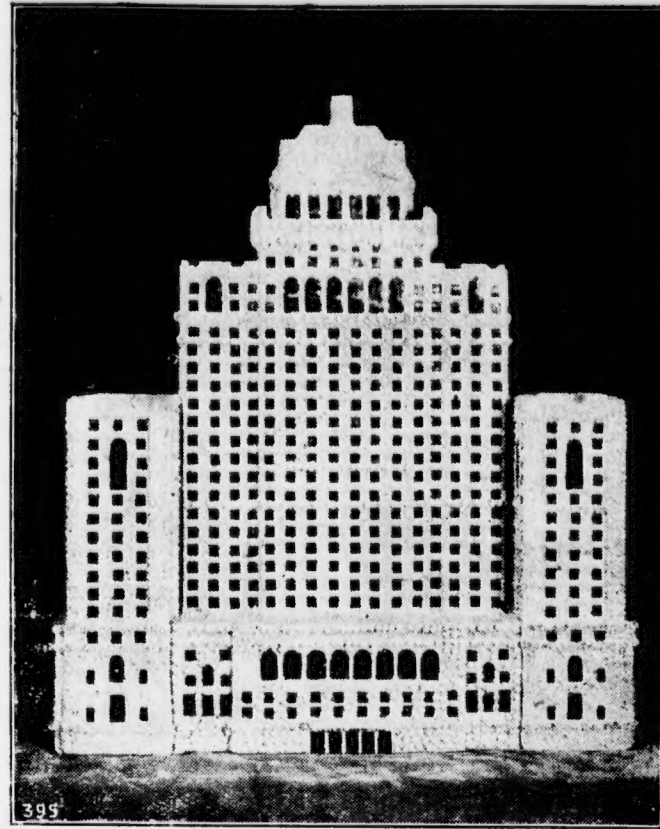

PUBLICITY BRANCH,
Department of Agriculture, Edmonton.

And see a man enter unquestioned
and bold,
"A saint?" I'll enquire, and old Pe-

ter'll reply.

"Well, I should say not, he's a news-
paper guy." —Selected

A Hotel in Diamonds

Like a story from the Arabian
Nights is the description of
the miniature model of the Royal
York Hotel, shown at the Toronto
Exhibition this fall. The model is
valued at over \$300,000 and in its
construction there were utilized
more than 15,000 Ellis faultless
quality diamonds. They were
mounted on a framework composed
of satin wood covered with the
finest wax. The miniature was
drawn true to scale and measured
15 inches high by 12 inches broad.
Reflected from thousands of facets,
the brilliant display of light,
broken into all the colors of the
spectrum, made this exhibit one of
the most visited and most talked-
of at the big Fall Fair.

Snicklefritz -----

Teacher: "What did Juliet say when she met Romeo in the balcony?"
Pupil: "Couldn't you get seats in the orchestra?"

Ella: "Your suit looks rusty."
Bert: "Well, the tailor did say it would wear like iron."

Wife: "Deceiver, I hate you!"
Husband: "But yesterday you said you loved every hair on my head."
Wife: "But not every hair on your shoulder."

Fritz: "Dad, you are a lucky man."
Father: "How is that?"
Fritz: "You won't have to buy me any school books this year. I have been left in the same class."

A young man had called upon his best girl the night before. As a result he had but poorly prepared his Virgil lesson. In spite of this fact he translated fairly well for a short time, but after reading "and I put my arms around her" he suddenly stopped, unable to translate farther and said: "That is far as I got professor." The instructor's reply was: "That is far enough, young man."

Doctor: Your husband must be ab-

solutely quiet. Here is a sleeping draught."
Wife: When do I give it to him?
Doctor: You don't; you take it your self.

.....
"The thing I fear most, doctor, is being buried alive."
"Don't you fear—if I attend you it will be impossible."

HISTORY AND MANAGEMENT OF DRUMHELLER HOSPITAL

(Continued from front page)

mine in Drumheller. Wherever there are mines there are accidents, and Drumheller is no exception to the rule. Dr. D. Graham, the first doctor to settle in that town, found it so. He had contracts with all the mines and most of the miners when he settled there in 1914 and he felt it was up to him to provide a hospital. He built a small emergency hospital and secured a trained nurse. The hospital was always packed, but there were no cases lost, not even when all patients were suffering from typhoid fever.

But in spite of Dr. Graham's efforts the hospital could not fulfill the need. There were many severe accidents in the mines and much sickness among the miners. Many patients had to be sent to Calgary or Edmonton for treatment.

At one time the miners contemplated building a 100 bed hospital for themselves. There were about 2500 miners in Drumheller then, and they were prepared to pay \$25.00 each into the initial building fund and to assess themselves for the balance required. But before action was taken, the Hon. A. G. McKay, first minister of public health brought in the Alberta Municipal Hospitals act, and the miners decided to take advantage of the act and join with the residents of the district surrounding Drumheller in the erection of a Municipal hospital. Indeed they were so anxious to have a hospital that they carried the vote in the face

of rural opposition. Today they see their insistence and their confidence in the scheme justified for they have at their service a fine three story brick hospital with accommodation for 140 patients and the best hospital equipment. The new wing which added 60 beds to the original 80, was paid for out of the surplus of \$70,000 accumulated since the hospital was built nine years ago, and leaves enough in the coffers of the board to provide for any possible emergency.

With the early operation of the hospital, the rural opposition quickly passed away and now rural and urban people join in hearty support of their own hospital. Rural ratepayers are taxed at the rate of 2 1-4 cents per acre and receive hospital treatment for \$1.00 per day.

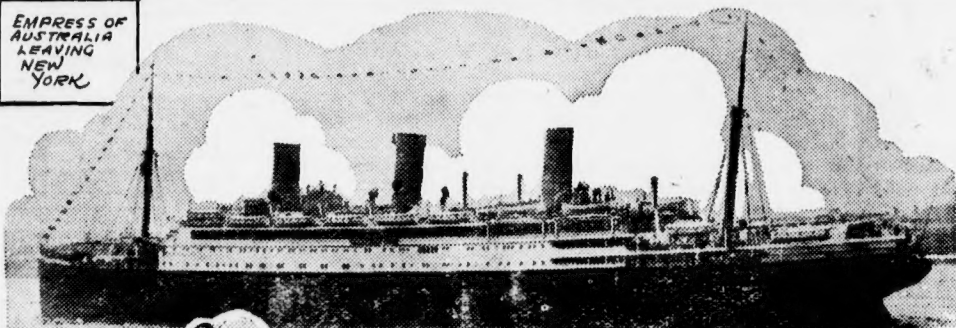

DON'T YOU WONDER TOO.

We sometimes wonder how it is that a man gets up in the morning after sleeping on an advertised mattress, on an advertised bed and pulls off advertised pajamas, takes a bath in an advertised tub, washes with advertised soap, shaves with advertised safety razors, using advertised soap, puts on advertised underwear and socks and adjusts with advertised garters, dons an advertised shirt and collar and shoes, and an advertised suit, indulges in breakfast on advertised cereal, drinks a cup of advertised coffee, puts on an advertised hat lights an advertised cigarette, rides to the office in an advertised car with advertised tires, uses an advertised fountain pen on advertised paper, at an advertised desk, dictates his letters to an advertised device and has them transcribed on an advertised typewriter, reads advertised books, attends advertised shows, deposits his money in advertised banks and then refuses to advertise on the grounds that advertising doesn't pay.

"The World's Mine Oyster," Said Falstaff •

EMPEROR OF AUSTRALIA LEAVING NEW YORK

JAPANESE DANCING GIRL

OLD NEPTUNE COMES ABOARD

Cruise. Besides making her regular visits to the highlights of the Mediterranean, to India, Japan, China, Hawaii and other fascinating places, her itinerary this time has been extended to include Athens in Greece, Paknam and Bangkok in Siam, with further calls at Keelung for Taikoku, in Formosa. She will be gone 137 days, visiting 81 ports and places in 24 countries.

"Why, then the world's mine oyster which I with sword will open," said a famous character of Shakespeare, but the modern version relates to going around the world in a big and comfortable steamship with no sword to open the oyster. These are days of peace and world travelers now planning their tours will be interested to know that one globe-girdling liner will call at ports hitherto omitted from her itinerary—ports rarely touched by cruising steamers. The "Empress of Australia," a 21,850 gross ton vessel, long a favorite with globe-trotters, will sail from New York December 1, 1929, on the seventh annual Canadian Pacific World

Athens is really three towns in one—the twisted lanes of the Athens that was little more than a Turkish village before the Greek War of Independence, the broad straight streets of the modern capital and the interesting ruins clustering round the Acropolis representing "the Glory that was Greece." The Parthenon, one of the most interesting ruins here, was chief among the buildings with which Pericles adorned the Acropolis about 500 B.C.

Bangkok, the capital of Siam, was originally built on floating

pontoons or piles on the river's edge, but nowadays well-planned roads and streets radiate from the city in all directions, beautiful Buddhist temples are scattered all over the town, and the Royal Palace is one of the show places of Bangkok.

Keelung, the chief port of the Island of Formosa, is a hive of industry. Formosa is half the size of Ireland and is governed by the Japanese. In its northern fastnesses, still largely unexplored, lived the headhunters. The Japanese campaign of subjugation, however, has all but wiped out these barbarous people. The seat of government at Formosa is Taihoku. Here fleets of junks, manned by coolies, transport the visitors around the town, one of the chief attractions of which is the Governor-General's garden, where the world's most beautiful tropical plants bloom in exuberant profusion.

Germany Planning World 'Plane Lines

Company Aims For Regular Flying Boat Service Over Atlantic In Two Years

A gigantic network of air lines which will cover the entire world is being planned by Lufthansa, Germany's most important air company.

The plans are being worked out by Otto Merkel, who has given up his post as head of Lufthansa to devote himself to founding an international company, which promises within two years to open regular air lines between Europe and the United States.

Working jointly with the Hamburg-American steamship line, preliminaries have been completed. The details of the new company are still somewhat uncertain, but the approximate direction of developments has been mapped out.

"Not only is the world's interest concentrated in air travel, but in all countries the best technical experts are working out the details," said Herr Merkel. "The experimental stage is behind us and the goal is clear. We have fine 'planes and, especially in America, excellent motors, and everywhere responsible pilots and dependable instruments which will result in an even higher standard soon."

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

SUNDAY SCHOOL LESSON

OCTOBER 6

RECOGNIZING OUR DEBTS TO OTHERS

Golden Text: "Not looking each of you to his own things, but each of you also to the things of others."—Philippians 2:4.

Lesson: Nehemiah 4:15-23; Mark 12:28-34; Romans 15:1-7; Philippians 2:1-8; Colossians 3:12; 4:1; James 2:14-17.

Devotional Reading: Psalm 40, 5-10.

Explanation and Comments

Recognizing Our Debt To Others, Mark 12:28-34.—A scribe who was standing by, and knew that Jesus had answered wisely the question put to Him, asked Jesus, "What Commandment is the first of all?" Jesus replied by quoting Deuteronomy 6:4-5: "Hear, O Israel; the Lord our God, the Lord is one; and thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength"—that is, with all thy powers. "In these terms some interpreters recognized the language of a primitive psychology, an attempt at a threefold or fourfold division of human nature, 'soul' referring to emotion, 'mind' to intellect, and 'strength' to will. But whatever may be thought of this suggestion, it is manifest that the words are intended to claim for God the affection of human nature in all its extent and in all its intensity."—James Stalker.

"The second is this," continued Jesus and quoted Lev. 19:18: "Thou shalt love thy neighbor as thyself." "The chief service rendered by Jesus to this second commandment was to associate it so closely with the first. In the Old Testament the two Commandments lie far apart with no indication of any connection between them; but He brought the two together in such a manner as to suggest that they have an intimate relation to each other. In reality they are twin commandments; and so closely are they connected that they cannot exist, or, at all events they cannot have a healthy existence, apart."—James Stalker.

Fulfilling Our Debt To Others, James 2:14-17.—"What doth it profit, my brethren," James asks (the Greek means literally, what is the use), "if a man say he hath faith, but have not works? can that faith save him?" When Ruskin says, "What we think, or what we know, or what we believe is, in the end, of little consequence; the only thing of consequence is what we do," he is speaking of a mere doctrine, a barren belief that does not lead to action; and so is James when he says, "What doth it profit if a man say he hath faith, but have not works?" Moreover, the "faith" referred to here, as the Expositor's Greek Testament explains, "faith is expressed in the 'Shema' (Deu. 6:4 etc.); 'Hear, O Israel, the Lord our God, the Lord is One'; this was the fundamental tenet of the Jewish faith, and that it is this to which reference is made, and not the Christian faith, is obvious from verse eleven, which contains the essence of the 'Shema'."

World Famous Artists On Canadian Radio

HAROLD BAUER

FLORENCE AUSTRAL

Florence Austral, the world's greatest dramatic soprano and Harold Bauer, one of the outstanding pianists of all time, two of the world famous artists who will be heard on the air this season during the Imperial Oil Hour of Fine Music, to be broadcast from Toronto every Sunday evening, beginning on October 6th, from 8 to 9 Central Standard Time. Miss Austral opens the series on Sunday evening, October 6th and Mr. Bauer will be heard on October 20th.

Announcement of a series of concerts by world famous artists on a Canadian radio chain was made yesterday by F. J. Wolfe, Director of Imperial Oil, Limited. The series will begin on October 6th and will continue for twenty-six weeks. It will be broadcast through stations at Montreal, Ottawa, Toronto, London, Waterloo, Winnipeg, Saskatoon, Regina and Red Deer and, with the completion of hook-up facilities at the end of the year, at Vancouver.

Among the universally known artists who have been engaged for this series are—Florence Austral, the world's greatest dramatic soprano; Sophie Braslau, the great contralto; Harold Bauer, one of the outstanding pianists; Richard Crooks, the American tenor who, though only twenty-eight years of age has scored notable triumphs in Europe and America; Lea Luboshutz, who is said to be the greatest of all women violinists; Hans Kinder, the famous Dutch cellist; The London String Quartet; Albert Spalding, great violinist; Luella Mallus, one of the most famous coloratura sopranos; Josef Lhevinne, the great Russian pianist; Richard Bonelli, leading baritone of the Chicago Opera; The Kedroff Quartet, formerly of the Imperial Palace at Petrograd, and others.

The series will consist principally of symphony concerts at most of

which one or more of these famous artists will assist. A great symphony orchestra of more than fifty players has been engaged and will be under the direction of Reginald Stewart, who has lately returned from a concert tour in Europe, and who has been engaged as a guest conductor for the London Symphony Orchestra in April next. The concerts will originate in Toronto and will be offered from 10 to 11 o'clock Eastern Standard Time for twenty-six consecutive Sunday evenings, beginning October 6th.

"Our object in promoting these concerts," Mr. Wolfe said, "is to bring to people within reach of available hook-up facilities in Canada, music and artists which, without the medium of radio, could not be heard outside the great metropolitan centres. We do not regard radio broadcasting as a direct advertising medium and feel that it can function most usefully in purveying entertainment of educational and artistic merit. The aim of the orchestra and guest artists will be to broadcast classical music and modern novelties of more than ordinary merit."

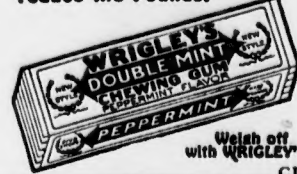

The series, which will be known as The Imperial Oil Hour of Fine Music, will go on the air through stations CHYC, Montreal; CNRO, Ottawa; CKNC and CFRB, Toronto; CJGC, London; CKCR, Waterloo; CKY, Winnipeg; CHWC, Regina; CFQC, Saskatoon; and CKLC, Red Deer.

Take Off Over-weight

Modern science says sugar supplies energy that lets you carry on with less food and safely reduce weight.

WRIGLEY'S is pure chiclé, sugar and flavor. Chewing the chiclé dissolves the sugar and releases the flavor.

In this pleasant way you get needed body fuel and reduce the pounds.

The Newspaper Guide

Advertisements Are To Shoppers What Time-Table Is To Traveller

The newspaper that carries a good line of advertisements is to the shopper what the time-table is to the traveller and the published guide to the tourist. Busy people start to study these advertisements in the home or in the office, and before they start shopping they know where they are going. . . . In fact, business places are points of interest to all tourists, and the non-advertiser puts himself outside the pale so far as strangers are concerned.

The Best Thing Out

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

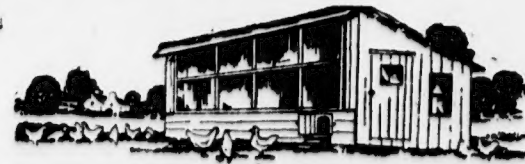

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club wins fame on Broadway as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous, too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes romantically interested in John Perry, Al's close friend, and Perry begs her to leave Al. On the third anniversary of his marriage Al takes Molly home from the Club Bombo, where he is part owner. She is moody; her conscience bothers her because of her behaviour with Perry. This is intensified when Al goes to the nursery and she sees how ardently he loves Junior. Later, in a burst of rage, she tells Al she doesn't love him any more. As Al recoils, Molly hears Junior calling her.

CHAPTER XV.

Junior had awakened to find that his toy, his woolly dog, had dropped out of bed. So he was calling to Molly to come and get it for him. As his high childish voice drifted through the rooms to Molly and Al they gave a start. The expression on Al's face softened in an instant. Molly's remained the same as she brushed by Al to look after Junior. Al turned, looking after her retreating figure, still in a daze from her harsh words. He had lost her love, she actually said so herself! Her words and the heart-breaking scene he had just passed through seemed fantastic and unreal to him. What had he done to deserve her indifference and her scorn?

Then, like a man in a dream, he followed her toward the nursery. Standing in the doorway, he saw her pick up Junior's woolly dog from the floor, replace it in the child's arms, and carefully tuck him in.

"Go to sleep, now, Junior. Then Mamma can sleep too."

How strangely contrasting was that soothing voice to the tone Molly had just used in addressing Al! And how kind the expression on Molly's profile as she bent over Junior's bed! Surely this was not the end, thought Al. He suddenly determined that he would not let their life together be blasted by her whim; he would fight to reawaken Molly's love!

As Molly came toward him he raised his hand with an apologetic gesture. "Darling, can't we talk this out? If I've done anything tell me!"

"No—no more talk!" Molly passed him, entering her bedroom. He heard her door close with a snap of finality.

But now Junior was sitting up, holding out his arms to his father. "Daddy, please sing me to sleep."

Al came forward swiftly, picking up Junior, holding him close as if to drive away the wound Molly had inflicted. Here, at any rate, was someone who loved him, trusted him, and always greeted him with

the same adoring, happy smile. For a moment Al choked up and couldn't speak. Then he said huskily,

"What do you want me to sing, baby?"

"You know," whispered Junior confidently, "that one about a little boy like me."

"Little Feller?"

"Yes, that one."

Slowly Al began to sing, rocking Junior gently to and fro. There was only an audience of one to hear—and that a very sleepy audience—but the tenderness and appeal of Al's words had not been matched since that night three years ago when he had sung the love ballad "Always," to touch Molly's heart. As the song continued Junior's head drooped in drowsiness and presently his eyes closed. When Al knew that he was really asleep the rhythmic words trailed off into a whisper and silence. Then, pressing the little form close to him for a last good-night hug, he put his son back in the bed.

Once more the tip-toeing from the room. Then Al stopped and gazed wonderingly at Molly's closed door. She was still up; in the semi-darkness of the hallway he could see a faint narrow line of light under the door?

Perhaps she was already repenting of her quick, unkind words—how passionately he wished that could be true! Her pride wouldn't let her make up to him now, but, perhaps in the morning.

Until the long black hours of the night faded into the gray dawn Al sat up in bed, gazing out over the lights of the city, smoking one cigarette after another, wondering, hoping, planning.

In the morning Molly's manner was still cold, but her whip-lash tongue was silent. She avoided meeting his eyes and when she spoke it was about necessary things concerning Junior or the household. Al watched her, hoping to detect a softening glint in those icy blue eyes, but there was no sign of relenting. Finally he left the apartment for his work.

All through the day and evening there was an actual sharp pain in Al's heart as if a knife had been driven swiftly into him and withdrawn. But he went about his work the same as usual, trying to forget the scene of the night before. When he saw Molly after her performance that evening he thought she was in better humor. She was not cordial, by any means, but she made some attempt to treat him courteously. His heart gave a bound; in a few days, he told himself, this mood of hers would wear off and she would be her own lovely self again. Their life together would not be smashed, after all.

So the days passed, with Molly avoiding Al most of the time, and maintaining a certain secrecy of manner when she did talk to him. Then New Year's Eve arrived, the New Year's Eve that Al was to remember always.

It was the big night in the city's life of revelry; snow blanketed the streets, embellishing the roofs and facades of the houses and skyscrapers, emphasizing the dazzling fantasy of brilliant Broadway.

At the Club Bombo the cause of "whoopie" had its most devoted adherents. The crowd in evening dress wore tiny carnival hats and danced with the true spirit of abandon as midnight approached. Long streamers of confetti in brilliant red, green, blue, yellow and purple were shot across the room, describing graceful curves before they fell across the dining tables and the shoulders of the dancers. It was the biggest crowd the Bombo had ever entertain-

ed and on the raised orchestra platform, stood Al, wearing a fantastic head-piece, a megaphone in his hands. He was leading the merriment, but the ache in his heart was still present.

Perhaps, he thought, the unrestrained gaiety of this night would change Molly's mood so she would become her old, friendly self. He gave a hurried glance toward her reserved table; she should be here by now. Then came the distracting business of introducing the celebrities, and once more he glanced at the vacant table and consulted his watch. Molly was at least a half hour late. He nodded toward the orchestra leader, signalling for another dance.

As the dancers swept toward the floor he retreated among the tables. What was keeping Molly? He could hear the shrieks of the sirens from outside the New Year had arrived, the time when feuds and misunderstandings are forgotten, new resolutions are made, and life begins anew. All this, he hoped desperately, would influence Molly.

The orchestra was playing with staccato briskness and abandon, the couples swayed and snuggled and called to one another.

"Choose a partner yourself!" cried a friend in passing, clapping Al on the shoulder. Al laughed in answer, but a moment later he moved toward the phone room at the rear. Perhaps Molly had gone straight home from the theatre—he must find out!

The phone room was a sort of alcove, with three or four booths. Al entered one, pulling the door shut and calling his apartment number. But the door suddenly drifted open, allowing a roar of happy sounds to enter. Just then he heard a feminine voice at the other end of the wire Molly's voice, he thought. He quickly pulled the door shut again and said:

"Molly, dearest, I've been holding your table for you—hoping you'd come."

But again the door flew open and he missed the answer.

(To Be Continued.)

THE RESPONSIBILITY OF EVERY MOTHER

The child in the home is a never-failing source of joy, but, at the same time a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child distress and puzzle her. She does not know just what to do, yet feels them not serious enough to warrant calling in the doctor. At just such times as these it is found that Baby's Own Tablets are the mother's greatest help and friend.

Most childhood ailments arise in the digestive tract—the bowels become clogged and the stomach sour. Baby's Own Tablets are a never-failing relief for this condition. They are a mild but thorough laxative and through their action on the stomach and bowels they banish constipation and indigestion; break up colds and simple fever; allay the pain accompanying the cutting of teeth and promote health-giving sleep. Concerning them Mrs. W. Jennings, Mackay, Ont., writes:—"I have used Baby's Own Tablets and think so highly of them that I would not be without them. Please send me your little booklet on the care of children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Works Both Ways

You will find, young man, that as long as you have to work for a living there will be something about the job you are on, or somebody working with you, that you don't don't like. Forget it and look to the future. Some other fellow may feel the same about you.

Minard's Liniment for Warts.

England has had only one king who grew to manhood and who never married. He was William Rufus, or William II., son and successor of William the Conqueror.

Real Dyes are easier to use

DIAMOND DYES are used by practically the same method as any other dye. They go on easier, though—more smoothly and evenly; without spotting or streaking. That's because they are made from real anilines, without a trace of fillers to injure fabrics or give things that redyed look.

Diamond Dyes contain the highest quality anilines that money can buy. That's why they give such clear, bright, new-looking colors, which keep their depth and brilliance so remarkably through wear and washings.

Next time you have dyeing to do, try Diamond Dyes—at our risk. See that they are easier to use. Then compare results. You will surely

agree Diamond Dyes are better dyes. The white package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Sun Proof

EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of dyes; the source of their rich colors; brilliance and permanence.

Strange Aerial Cargoes

Airplanes Are Now Used To Carry Every Kind Of Shipment

Fifty tons of milk are being carried every week by aeroplane between London and the Continent, says a Tit-Bits writer.

Recently a consignment of seahorses for the Zoo arrived by aeroplane at Croydon. Great care was lavished on these fantastic creatures, half horse and half dragon, which were caught in the Bay of Biscay, and throughout the flight air was pumped into their tanks at ten-minute intervals.

Delicate goldfish are often transported in this manner, but the most valuable fish cargo by air was a number of very rare, rainbow hued specimens from the East Indies, some of which were valued at \$180 per inch.

A barred cage was recently built inside the fuselage of an aeroplane which left Croydon for Le Bourget, where it picked up a fully grown lion, complete with trainer, and brought them back at over 100 miles an hour.

Another special compartment was fitted in an aeroplane to accommodate a performing circus horse from Paris to London; while an airfreighter arrived recently from Amsterdam with a bear, a monkey and a consignment of parrots.

Twenty years ago it would have been impossible to build a road to the site of the new observatory on Mont Blanc. The aeroplane has made it possible to convey the stones and materials to a height of over 13,000 feet on the mountain side; but when the road is completed it will be one of the most expensive in the world.

It seems strange that milk, easily obtainable in all great cities, should be carried by air, but mysterious zinc-lined boxes were once regularly carried from Croydon to Paris, and these contained two gallons of milk in glass bottles, packed in ice.

The American visitors to whom the boxes were addressed had been so impressed with the purity of English milk that they cheerfully paid 80c. a pint to have it delivered to them in Paris!

Applies To Every Nation

If China and Russia should go to war ninety-five per cent. of the population of either country wouldn't know what it was all about. But that is pretty nearly the case with a war in any nation.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with Worms. Use Mother Graves' Worm Expeller.

Friend—You think then that the heathen are slow to adopt the white man's religion.

Globe Trotter—Yes. You see, they have to adopt his vices before they see the need of it.

Many would put the world right, but forget to start with themselves.

For Sprains—Use Minard's Liniment.

Little Helps For This Week

"He will be very gracious unto thee at the voice of thy cry."—Isaiah xxx. 19.

Father! before Thy footstool kneeling,

Once more my heart goes up to Thee;

For aid, for strength, to Thee appealing.

Thou who alone canst succor me.

And oh! in my exceeding weakness, Make Thy strength perfect; Thou art strong!

Aid me to do Thy will with meekness,

Thou to whom all my powers belong.

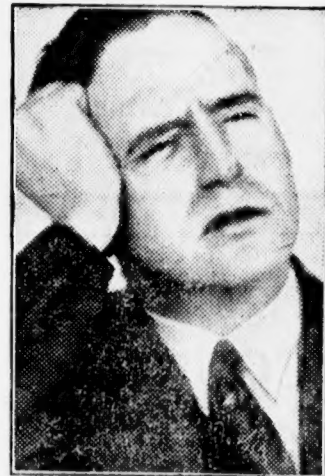

There is no good in praying for anything, unless you will also try for it. All the sighs and supplications in the world will not bring wisdom to the heart that fills itself with folly every day, or mercy to the soul that sinks itself in sin, or usefulness and honor to the life that wastes itself in vanity and inanity.

—Henry J. Van Dyke.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Opinion Wasn't Worth Much

It is told of a popular solicitor that he called upon a brother in the profession, and asked his opinion upon a certain point of law. The lawyer to whom the question was addressed drew himself up and observed: "I generally get paid for what I know." The questioner drew a half dollar from his pocket, handed it to the other and coolly remarked: "Tell me all you know and give me the change."

DOCTORS quite approve the quick comfort of Aspirin. For these perfectly harmless tablets will ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to women; many have found them marvelous at such times. The proven directions found in every package of Aspirin tell how to treat colds, sore throat, neuralgia, neuritis, etc. All druggists.

WORLD'S FAMOUS THREE FUEL HART PARR

In special tests conducted by nationally known engineers who used cheap distillate fuel the great Hart Parr 18-36 registered a draw bar pull of 5,535 pounds at 2 miles per hour and 4,075 pounds at 3 miles per hour. On the belt it easily pulled the amazing load of 43 horse power. The Hart Parr is a three fuel tractor and will burn gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest low grade fuel. Hart Parris are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive yourself and experience the thrill of controlling tremendous power.

AMERICAN FARM
BOARD TO INVESTIGATE WHEAT
SITUATION

WASHINGTON—By request of the recently created federal farm board of the United States bureau of agricultural economics has undertaken an investigation of the disparity between Canadian wheat prices and wheat prices in the northern states.

To ascertain the causes of the difference the bureau has begun an inquiry into the amount and availability to country and elevator storage in the two countries; transportation charges will be a factor to consider; the comparative quality of the wheat offered to domestic and world markets and all other influences that affect prices in the Dominion and the United States will be examined.

Field workers are already engaged in this undertaking and price experts in the bureau at Washington are studying the economics of the situation. The study will include examination of the prices at country shipping points in relation to prices at terminal markets; also a comparison of American terminal market prices by grades and classes of wheat, cash and future, with prices at Winnipeg.

The information to be obtained will be utilized by the federal farm board to serve as a guide in determining its future policy respecting expansion of farmer-owned and controlled storage facilities and toward co-operative marketing of wheat in general.

The board hopes to assist American farmers to enter into co-operative action as this is understood by the Canadian wheat pools. The main difference between the Canadian and the United States situation is that in Canada the co-operating farmers have practically wholly financed their own corporations; in the United States the government has put a fund of half a billion dollars at the disposal of the farm board for auxiliary financing. In addition to what farmers do for themselves through their own banks.

NEWS OF ALBERTA

Premier Brownlee and A. B. Claypool visited St. Paul on October 2nd and held a public meeting at that point.

A campaign has been started for a pipe organ for the United Church at Claresholm. The first four checks received were for \$100 each.

E. J. Garland expects to commence his annual tour of the constituency about the end of October and his first meeting will be held at Rockyford.

The Bassano people are protesting the change in the train schedule on account of the mail service they will receive.

The Fuego oil well which has been drilling ten miles south of Oyen for the past couple of years, blew in a few days ago with a tremendous roar.

To date, 50,000 bushels of wheat have been marketed at Three Hills. It is estimated that there will be 170,000 bushels to dispose of in that district.

The by-law to raise \$10,000 by debenture for the purpose of building a covered skating rink at Oids, was approved by the Board of Utilities commissioners.

A spectacular fire, which destroyed two trucks and a touring car, broke out Monday night last at the City Cartage garage at Drumheller.

Over 700 persons were present at the Merchants Annual Picnic, which was held at Didsbury last week.

Ben. A. Huckell, Editor and publisher of the Innisfail Province was elected president of the Alberta Division Canadian Weekly Newspapers Association at their convention in the Macdonald Hotel in Edmonton last Thursday.

Wilbur, having been to New York, was telling his cronies of the sights he saw.

"An' up at the hospital I seed one of these machines that tell if a man is lying."

"Pooh," said Luke from his corner. "Pooh? Did you ever see one?"

"See one? I married one."

just off the press, by Georgina Sackville. Contains special information for married people. \$2.30 each with order. "Home Publications," 320 P. Burns building, Calgary.

PUBLIC NOTICE

TAKE NOTICE that the Council of the Village of Carbon intends to pass a Zoning By-law under the provisions of the "Town Planning Act," being chapter 49 of the Statutes of Alberta, 1929, making regulations for any of the purposes set out in Section 30 of the said Act which the Council may consider to be of Public interest. The proposed by-law shall, among other regulations, impose certain building restrictions in that portion of the Village of Carbon lying north and west of the Kneehill creek and shall be subject to the approval of the Minister of Municipal Affairs.

On and after October 1st, 1929, any person interested may inspect the proposed by-law at the office of the Secretary-Treasurer between the hours of 2 and 6 o'clock p.m. on any day except Sunday. The Council shall at its regular monthly meeting to be held at the office of the Secretary-Treasurer on the 2nd day of December, 1929, hear and determine all objections (if any) to the proposed by-law and shall pass the by-law at the same meeting unless any objection is sustained.

Dated at Carbon this 25th day of September, 1929.

Who Does Your
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT
